RESPONSE TO RESTRICTION REQUIREMENT

Mail Stop AMENDMENT
Commissioner for Patents
P. O. Box 1450
Alexandria, VA 22313-1450

Sir:

The Office Action mailed June 29, 2005 has been carefully reviewed and the following remarks have been submitted in consequence thereof. In response to the election requirement set forth in the Office Action, Applicant elects, with traverse, for prosecution in this application all claims of Group I as identified in the Office Action, namely, Claims 1-36, "drawn to method of underwriting a reinsurance product".

Reconsideration of the restriction requirement imposed under 35 U.S.C. § 121 is respectfully requested. The restriction requirement is traversed because the inventions set out by the claims in Groups I and II are clearly related. Applicant submits that a thorough search and examination of each of these claim groups would be relevant to the examination of the other group and would not be a serious burden on the Examiner. More specifically, the Office Action asserts that the claims of Group I are drawn to a "method of underwriting a reinsurance product", and the claims of Group II are drawn to "a graphical user interface for insurance auctioning". Applicant respectfully traverses these assertions. Applicant submits that the claims of Group I are actually drawn to a method of coordinating, by a sponsor, an auction for providing reinsurance for an insurance program, and the claims of Group II are actually drawn to an interactive system for auctioning insurance. In other words, the claims of Groups I and II are

directed to a method of coordinating an insurance auction, and an interactive system for auctioning insurance, respectively. Accordingly, Applicant submits that the claims of Group I and the claims of Group II are clearly related.

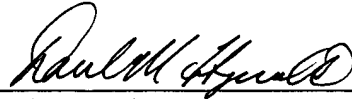

Because the claims of Group I and the claims of Group II are clearly related, Applicant further submits that it would not present an unreasonable burden on the Examiner to examine both these claim Groups. For at least these reasons, it is respectfully submitted that the restriction requirement is improper and should be withdrawn.

The restriction requirement with respect to the claims in Groups I and II is further traversed. The Office Action asserts that the claims in Groups I and II are “related as subcombinations disclosed as usable together in a single combination” and that the “subcombinations are distinct from each other if they are shown to be separately usable.” The Office Action further asserts that the claims in Group II have “separate utility such as allowing users to learn about and exchange financial products and services online” and that the claims in Group I have “a different use such as underwriting for securities”. Applicant respectfully disagrees with these assertions and submits that the claims of Group I are drawn to a method of coordinating an insurance auction. Accordingly, in contrast to what is asserted in the Office Action, the claims of Group I are not directed to a use such as underwriting for securities, but rather are clearly directed to a method of coordinating an insurance auction. Moreover, in contrast to what is asserted in the Office Action, the claims of Group II are not direct to a use such as allowing users to learn about and exchange financial products and services online, but rather are clearly directed to an interactive system for auctioning insurance.

Applicant therefore submits that the claims of Group I and the claims of Group II are both directed to an insurance auction. Accordingly, Applicant submits that the claims of Group I and Group II are not patentably distinct.

In addition, requirements for restriction are not mandatory under 35 U.S.C. Accordingly, reconsideration of the restriction requirement is requested.

Respectfully Submitted,

Daniel M. Fitzgerald
